

ROUND 2 EVALUATION RUBRICS

Round 2.1 (Progress Review) & Round 2.2 (Final Round)

ROUND 2.1 — Progress Review

Date: Saturday/Sunday, 22–23 August
Mode: Online
Expected Progress: 30–60% of proposed solution completed
Format: Presentation/demo to committee members
Time Limit: 10–12 min presentation/demo + 5–7 min Q&A

Rubric — 50 Marks

Criterion	Marks	Evaluation Focus
1. Working Prototype / Live Demo Quality	10	Real functioning modules shown (not just slides/mockups); stability of what is demoed.
2. Technical Implementation & Architecture	10	Correct, justified use of proposed tech stack; system/code design quality so far.
3. Progress vs Planned Roadmap Problem–Solution Alignment	10	Progress still solves the original problem/gap; no unexplained scope drift. % of proposed scope actually completed; alignment with the plan/timeline shared in Round 1.
4. Feasibility of Remaining Work	5	Realistic, specific plan to reach 100% by Round 2.2; risks identified.
5. Handling of Round 1 Feedback (if any)	5	Visible action on feedback/comments given after Round 1.
6. Q&A — Clarity & Technical Understanding	10	Team (not just one member) can explain design choices and justify decisions under questioning.
TOTAL	50	

ROUND 2.2 — Final Round

Date: 27 August

Mode: Offline

Expected Progress: 100% completion, with Round 2.1 feedback implemented

Format: Final demo/presentation to committee

Time Limit: 10–12 min demo/presentation + 5–8 min Q&A

Rubric — 100 Marks

Criterion	Marks	Evaluation Focus
1. 100% Completion of Proposed Solution	20	Full planned scope delivered and working; no critical feature missing.
2. Round 2.1 Feedback Incorporated	10	Specific, visible changes made in response to Round 2.1 evaluator feedback.
3. Live Demo & End-to-End Functionality	20	Complete workflow demoed live, stable, on real/realistic data — not simulated screens.
4. Technical Depth & Architecture Quality	15	Code/system quality, correct and justified tech choices, engineering rigor.
5. Innovation, Feasibility & Scalability	10	Genuine differentiation; solution can realistically scale beyond the prototype.
6. Presentation Quality & Time Management	10	Clear, structured walkthrough within the allotted time; effective use of demo vs talk.
7. Q&A — Depth of Understanding	15	Team defends design/technical decisions confidently; handles challenge questions, not just rehearsed answers.
TOTAL	100
